After the proceeding had begun, SEMAR informed that the fish farming project presented is conceptual and needs to be complemented with tangible projects. It was identified three aspects that needs improvement: the course of the water; fish farming project; recovery financial costs. After discussions, the following controversial topics remained. As for the course of water, it was pointed out that the drainage built under the highway was not built in the correct location and with insufficient capacity. Moreover, regarding river sources, the community argues that they were compromised by the construction work, despite the fact that the contracted company has stated that the water sources and the water course existed before the construction work. Regarding fish farming, the presented project by the construction company for the use of the loan funds, proved to be unfeasible for SEMAR, in the tank-net model. The community, however, insisted that in some loan funds have already been raising and even selling fish, and insist that in some of them it is viable to develop the activity, starting from another model. It was agreed, then, that the construction company would complement the study presented, analyzing again the possibility of transforming some specific

boxes loan funds in fish tanks, and proposing a solution for the remaining, including the decline of the slope and use of the area for horticulture.

The following SCHEDULE was established:

- Within five (5) days, SEMAR shall send to the Federal and State Prosecutor's Office and to INCRA the shown EIA/RIM copy, as well as its considerations already mentioned in the meeting with the State of Piauí.

It is granted to the Prosecutor's Office the right to be represented by technicians to monitor the work.

- Day 03/13/2018 - deadline for the construction company Oasis to present the technical study on the already mentioned controversial topics (loan funds and the course of the water) for SEMAR's analysis. The study should also be sent to INCRA and to the State and Federal Prosecutors' Offices.
